Building a Human Firewall through Cybersecurity Leadership and Policy

Mansur Hasib, University of Maryland University College

Abstract:

In his widely acclaimed book Cybersecurity Leadership, Dr. Hasib defines cybersecurity as the mission focused and risk optimized governance of information, which maximizes confidentiality, integrity, and availability using a balanced mix of people, policy and technology while perennially improving over time. His research and experience show that people are the most critical component of any cybersecurity strategy. Therefore the role of leadership in shaping culture and behavior is critical. Governance requires leadership engagement and policies to develop the desired culture in an organization.

In this session Dr. Hasib explains the role of people, leadership, policies and culture in developing a cybersecurity culture of perpetual innovation. He discusses recent breaches and shares his experiences in creating a human firewall by engaging people, building cybersecurity culture, teamwork, and inspiring innovation – thus making cybersecurity a powerful revenue driver in any organization.

Bring questions, opinions, and ideas and join this highly interactive session. Signed copies of Dr. Hasib’s books will be available at the conference.

Key takeaways:

Cybersecurity is more about people and culture than it is about technology. The role of cybersecurity leadership and policy is critical for organizational success cybersecurity leadership is an innovation engine.
